

Certificate in Information Security Management Principles

Overview

CISMP course is designed to provide the foundation of knowledge necessary for individuals who have information security responsibilities as part of their day-to-day role. The information security essentials training prepares you to develop and implement a comprehensive information security strategy that will help your business to stay competitive. It covers key security concepts, providing real-world examples of how to implement security measures and risk mitigation methods in your organization.

Course Contents

The course consists of ten modules:

- Module 1 – Information Security Management Principles
- Module 2 – Information Risk
- Module 3 – Information Security Framework
- Module 4 – Procedural/People Security Controls
- Module 5 – Technical Security Controls
- Module 6 – Software Development and Lifecycle
- Module 7 - Physical and Environmental Control
- Module 8 - Disaster Recovery and Business Continuity Management
- Module 9 – Other technical Aspects
- Module 10 – Preparation for the CISMP Examination.

At the end of each module the student can undertake an assessment to assess their understanding of the information provided in that module and to see if the objectives of the module have been met. Each topic also contains a quiz that enables a student to test their knowledge of the information covered in that topic.
