GDPR

Overview

The General Data Protection Regulation (GDPR) is designed to balance the need for businesses' and customers' data information to flow freely, and the need to protect the rights of the individual.

As a professional you need to be aware of the legal requirements of the GDPR so you can ensure your organisation is compliant.

On this course you will get a thorough introduction to GDPR so you can grow your understanding of protecting personal data and be able to handle data in the digital economy appropriately.

This course is for anyone handling customer data, whether you work with customers in person, over the phone, or through digital or paper correspondence. You don't need any previous experience.

What you'll learn

- **Section 13:** How Technology can help in achieving GDPR compliance
- **Section 14:** Conclusion

Who this course is for:

- Anyone interested in GDPR compliance
- Any security enthusiast willing to learn about GDPR
- Anyone interested in how to start a GDPR programme
- Anyone interested in technologies that can help achieving GDPR compliance
- Anyone interested in making a turn in their career to DATA PRIVACY
- Any privacy consultant, manager, director or DPO
- Any lawyer interested to learn about data privacy and how technology may fit in this picture also

GDPR - in a nutshell

It explains the rationale for data protection regulation and provides an overview of the GDPR. It outlines the six data protection principles and the accountability principle. It explains the new and enhanced data subjects' rights. Significant compliance issues, such as subject access requests, the impact on direct marketing and personal data breach reporting are considered.

This GDPR awareness training is structured around four topics

- GDPR – rationale and overview
- Principles and accountability
- Individual rights
- Applying the GDPR

Topics

GDPR – rationale and overview

This topic introduces the GDPR. The GDPR's background, key roles and definitions are outlined. The increased penalties and exemptions are described.

Principles and accountability

This topic introduces the six data protection principles underpinning the GDPR. The overarching accountability principle is explained.

Individual rights

This topic outlines the individual rights that EU citizens have under the GDPR. It also considers the business impact of serving those rights.

Applying the GDPR

This topic considers three challenging GDPR compliance subjects. These are: subject access requests (SARs), the impact on direct marketing and personal data breach reporting.
