

Microsoft Azure Architect Design: AZ-304

Overview

This Azure training course covers the more advanced activities on the Azure platform, such as managing Azure resources, configuring and deploying virtual machines and networks, mastering Azure AD, and securing data. You will also learn how to identify data storage options, integrate SaaS service on Azure, author deployments, and more.

Course Content

- Lesson 01: Course Introduction
- Lesson 02: Design Monitoring
- Lesson 03: Design Identity and Security
- Lesson 04: Design Data Storage
- Lesson 05: Design Business Continuity
- Lesson 06: Design Infrastructure

Learning Objectives

After completing this online Azure certification training course, you will be able to:

- Manage security and identity for Azure solutions
- Integrate SaaS services available on the Azure platform
- Compare and analyse database options in Azure
- Monitor and automate Azure solutions
- Deploy resources with Azure Resource Manager
- Choose the correct backup option for infrastructure and data hosted in Azure
- Automate the deployment of future resources for backup recovery or scaling purposes
- Build Azure IaaS-Based Server Applications (ADSK)
- Deploy network infrastructure for use in Azure solutions
- Integrate Azure solution components using messaging services
